

Quick Reference

Through the eye and face protection range, there are a number of quick reference logos to help you choose which level of safety is right for you. Below are the logos and their meanings.

-  Adjustable frames for a superior fit.
-  Wrap around single lens provides unobstructed field of vision.
-  Resistant to flames and heat - not flame-proof.
-  Designed to minimise dust contamination.

-  Polycarbonate lenses are more impact-resistant and lighter than most types of lens.
-  Has a lower impact energy rating and is more flexible compared to polycarbonate.
-  This provides increased safety, while retaining excellent visibility.
-  Gives a level of protection against harmful UV rays.

-  Extended brow guard moulded into the top of the lens gives a near perfect orbital seal against debris.
-  For greater protection from debris towards the side of the eyes.
-  Glasses which have a larger lens to cover the cheek bone.
-  Resistant to chemical splashes - not chemical proof.
-  Hard coated for excellent durability and scratch resistance resulting in unobstructed viewing.
